

**Faecal Sludge Management-**

After surveying a total of 295,623 toilets constructed in the district Lalitpur, 63,646 single-pit toilets and 6,990 toilets without soak pits but with septic tanks were found. In the financial year 2025-26, the construction of a second pit for single-pit toilets and the construction of a soak pit for toilets without soak pits but with septic tanks is to be carried out. Also, 3 faecal sludge treatment plants are to be constructed in rural areas. Keeping in mind the maintenance of each component for the establishment of the said scheme, it is planned to be run through the funds available in the Gram Panchayat and with the help of MNREGA.
