

## **Gobardhan Project**

Two biogas plants have been established in the district under the scheme.

The first biogas plant, with a capacity of 85 cubic meters, has been set up in Gram Panchayat Karipahadi of Jakhaura Development Block and is being operated regularly in a fully functional manner. Electricity generated from the biogas produced by this plant is being used to operate a grain milling unit. In addition, cooking gas is being supplied to 12 nearby households, which is providing the Gram Panchayat with continuous additional income in the form of Own Source Revenue (OSR).

The second biogas plant, with a capacity of 85 cubic meters, has been established in Gram Panchayat Khandi of Talbehat Development Block. The construction work of this plant has been completed 100 percent, and it is also fully operational. Through this plant, cooking gas is being supplied to 06 nearby households. Furthermore, a grain milling unit is being operated for income generation.
