

Note on Construction and Utilization of Community Toilet at Gram Panchayat Level

At the Gram Panchayat level, the construction of a Community Toilet has been successfully completed and the facility is being regularly used by local residents. In addition to villagers, visitors and outside crowds arriving in the Gram Panchayat area are also utilizing the community toilet, which has significantly reduced open defecation and improved overall sanitation conditions.

The establishment of the community toilet has proved highly beneficial for the villagers, especially during community gatherings, meetings, and collective programs organized at the Gram Panchayat level, where the availability of sanitation facilities is essential.

For the operation and maintenance of the community toilet, women from Self Help Groups (SHGs) have been engaged and entrusted with the responsibility of regular cleaning, upkeep, and supervision. This initiative not only ensures proper cleanliness and hygiene of the facility but also provides a sustainable source of livelihood for SHG women, thereby promoting women empowerment.

Overall, the construction of the community toilet at the Gram Panchayat level has greatly enhanced public convenience, improved sanitation standards, and provided essential support during social and community activities, making it a highly useful and impactful asset for the Gram Panchayat.
