

Under the GOBARDHAN Scheme, a 45 cubic metre biogas plant has been constructed at Gram Panchayat Belwaniya, Block Koraon. The biogas plant has been established near the Gaushala located within the said Gram Panchayat.

Electricity is being generated from the biogas produced by the plant and is being utilized for local requirements. In addition, vermi-compost manure is being prepared from cow dung at the same site, which is contributing to revenue generation at the Gram Panchayat level.

For the operation, maintenance, and regular supervision of the biogas plant and vermi-compost unit, a designated person has been engaged. The monthly remuneration of the person is being paid from the revenue generated through the sale of vermi-compost manure.

Overall, the biogas plant is functioning satisfactorily and is proving beneficial in terms of renewable energy generation, scientific management of organic waste, livelihood support, and financial sustainability at the Gram Panchayat level.
