

Community Toilets

In previous financial years, construction of 403 Community Toilets has been completed in 401 out of the total 415 Gram Panchayats of the district, utilizing funds from Gram Panchayat resources and PIGF. With regard to the remaining 14 Gram Panchayats, proposals were submitted informing about the non-availability of suitable land for construction of Community Toilets.

Out of the 403 constructed Community Toilets, information has been received at the Gram Panchayat and Development Block levels regarding partial non-functionality of some units due to issues such as structural damage, faulty fittings, filled or damaged pits, inadequate water supply, shortage of caretakers, and pending residual payments. In response, necessary and feasible actions are being undertaken to restore and make these non-functional Community Toilets fully operational, with the objective of ensuring sustainability of the Open Defecation Free (ODF) status in rural areas
